

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Burr.

Bird

The Bird and the Burdock.

Who is there who has never heard,
About the Burdock and the Bird?
And yet how very very few,
Discriminate between the two,
While even Mr. Burbank can't
Transform a Bird into a Plant!

Burbank.

The Clover. The Plover.

The Plover and the Clover can be told
apart with ease,
By paying close attention to the
habits of the Bees,
For ento-molo-gists aver, the Bee
can be in Clover,
While ety-molo-gists concur, there
is no B in Plover.

The Crow.

The Crocus.

Some are unable, as you know,
To tell the CROCUS from the Crow;
The reason why is just because
They are not versed in Nature's laws.
The noisy, cawing Crows all come,
Obedient to the Cro'custom,
A large Crow Caw-cus to convoke.
You never hear the Crocus croak!

The Rue. The Rooster.

Of Rooster the rudiment clearly
is "Roo",
And the bird from the plant
very probably grew.
You can easily tell them apart
without fail,
By merely observing the Rue
lacks de-tail.

The Parrot. The Carrot.

The Parrot and the Carrot we may
easily confound,
They're very much alike in looks
and similar in sound,
We recognize the Parrot by his
clear articulation,
For Carrots are unable to engage
in conversation.

The Pea. The Pewee.

To tell the Pewee from the Pea,
Requires great per-spi-cac-ity.
Here in the pod we see the Pea,
While perched close by is the Pewee;
The Pea he hears the Pewee peep,
While pewee sees the wee Pea weep.
There'll be but little time to see,
How Pewee differs from the Pea.

The Pelican. The Panicle.

The Panicle and Pelican
Have often been confused;
The letters which spell Pelican
In Panicle are used.
You never need confound the two,
There are many ways of telling:
The simplest thing that one can do,
Is to observe the spelling.

The Hen. The Lichen.

The Lichens lie on rocks and bark,
They look somewhat like Hens:
Hens lay, they lie, we may remark,
A difference of tense.

The Hawk. The Hollyhock.

To recognize this Bird-of-Prey,
The broody Hen you should survey:
She takes her Chicks on daily walks,
Among the neighboring Hollyhocks,
While with the Hawk association,
Is quite beyond her toleration.

The Cow Bird. The Cowslip.

Growing in mires, in gold attired,
The Cowslip has been much admired,
Altho' its proper name, we're told,
Is really the Marsh Marigold:
The Cow Bird picture, I suspect,
Is absolutely incorrect,
We make such errors now and then,
A sort of cow slip of the pen.

A Sparrow. Asparagus.

The Sparrow, from flying, is quite
out of breath,
In fact he has worked himself
almost to death,
While the lazy Asparagus, —
—so it is said,—
Spends all of his time in the
'sparagus bed.

The Tern. The Turnip.

To tell the Turnip from the Tern,
A thing which everyone should learn,
Observe the Tern up in the air,
See how he turns,—and now compare
Him with this inert vegetable,
Who thus to turn is quite unable,
For he is rooted to the spot,

While as we see the Tern is not:
He is not always doomed to be
Thus bound to earth e-tern-ally,
For "Cooked to a turn" may be inferred,
To change the Turnip to the Bird.

Observe the Turnip in the pot,
The Tern is glad that he is not!

The Ole Gander. The Oleander.

The Gander loves to promenade
Around the farmer's poultry-yard,
While, as we see, the Oleander
Is quite unable to meander.

The Blue Mountain Lory. The Blue Morning Glory.

The Blue Mountain Lory spends most
of his time
In climbing about in a tropical clime;
We therefore our efforts need only
confine,
To minutely observing the climb
of the Vine.

The Quail. The Kale.

The California Quail is said
To have a tail upon his head,
While contrary-wise we style the Kale,
A cabbage head upon a tail.
It is not hard to tell the two.
The Quail commences with a queue.

The Pecan. The Toucan.

Very few can
Tell the Toucan
From the Pecan —
Here's a new plan:
To take the Toucan from the tree,
Requires im-mense agil-i-tee,
While any one can pick with ease
The Pecans from the Pecan trees:
It's such an easy thing to do,
That even the Toucan he can too.

The Auk. The Orchid.

We seldom meet, when out to walk,
 Either the Orchid or the Auk;
 The Auk indeed is only known
 To dwellers in the Auktic zone,
 While Orchids can be found in legions,
 Within the equatorial regions.
 The graceful Orchid on its stalk,
 Resembles so the awkward Auk;

'Tis plain we must some means
discover,
To tell the two from one another:
The obvious difference, to be sure,
Is merely one of temperature.

For Eskimos, perhaps, the Auk
Performs the duties of the Stork.

The Cat-bird. The Cat-nip.

The Cat-bird's call resembles that,
Emitted by the Pussy Cat,
While Cat-nip, growing by the wall,
Is never known to caterwaul:
Its odor though attracts the Kits,
And throws them in Catnaption fits.

The Ibis. The 'Ibiscus.

The sacred Ibis tells his beads,
And gravely from his prayer-book reads;
The Ibis therefore we may say,
Is classified a bird-of-prey.
'Ibiscus we have heard related,
The "Crimson-Eye" is designated;
Their difference is plain indeed,
The flower is red, the bird can read.

The Butter-ball. The Butter-cup.

The little Butter-cup can sing,
From morn 'til night like anything:
The quacking of the Butter-ball,
Cannot be called a song at all.
We thus the flower may learn to know,
Its song is reproduced below.

The Bay

The Jay.

The Blue-Jay, as we plainly see,
Resembles much the green Bay tree:
The difference between the two,
Is ob-vi-ous-ly one of hue.
Though this is not the only way,
To tell the Blue-Jay from the Bay.

The Pipe. The Snipe.

Observe the common Indian Pipe,
Likewise the high-bred English Snipe,
Who is distinguished, as we see,
By his superior pedigree.

Two crosses botmy
bend sinister.

Fess argent
Martlets sable.

The Roc The Shamrock.

Observe how peacefully the Cows
 Among the little Shamrocks browse,
 In contrast with their actions frantic
 When they perceive the Roc gigantic;
 We need but watch their occupation,
 And seek no other explanation.

of
Natural
Size.

The Lark. The Larkspur.

The Larkspur's likeness to the Lark
Is surely worthy of remark,
Although to see it we require
The aid of a small magnifier,
Which circumstance of course implies,
Their difference is one of size.

Puffin.

Nuffin.

Upon this cake of ice is perched
The paddle-footed Puffin:
To find his double we have
searched,
But have discovered—Nuffin!

TO THE
AUTHOR

Author's Apology.

Not every one is always able
To recognize a vegetable,
For some are guided by tradition,
While others use their intuition,
And even I make no pretense
Of having more than common sense;
Indeed these strange homologies
Are in most flornithologies,
And I have freely drawn upon
The works of Gray and Audubon,
Avoiding though the frequent blunders
Of those who study Nature's wonders.
